Top Tips for Parents and carers

- Explore the internet together - they will learn from you and you can manage what they see.
- Keep internet use to family spaces (lounge, kitchen etc) rather than letting your children watch on their own in their own bedroom or a closed off room such as an office.
- Learn how to activate parental controls on your broadband
- Activate safe search settings on Google or use a search engine for children
- Use passwords on your internet enabled devices so children need you to login to access them
- Use age appropriate sites and apps (iplayer kids, youtube kids, Netflix for kids etc)
- Set boundaries - do this early! What rules can you stick to? Technology after 4pm? 30 minutes/1 hour a day? Family time to explore/play together?
- Know how to report anything you are worried about. Report anything suspicious or concerning to CEOP (www.ceop.police.uk). More parent help can be found here www.childnet.com/parents-help
